Late News at the Seat of Government.

Adjournment of Congress.

Congress adjourned on Friday last, after adjusting such differences as remained between the two houses. The Sundry Civil Appropriation Bill was inally passed with a provision giving he Chicago Columbian Fair \$2,500 .-300. In regard to the charges of drunkenness upon the floor of the House, made by Congressman Watson, of Georgia, the Committee of Investigation made a report saying that it has no hesitation in declaring that the charges, construed in the sense in which they are made, are false and libelous; that the evidence was overwhelming that the charge involving Representative Cobb is contradicted by the witnesses, and there was nothing in the evidence to justify the imputation made against him. The facts are, the report says, that three and possibly four members appeared on the floor more or less under the influence of liquor, but none in the condition described in the charges. The committee's resolution the training of young colored men | Watson are not true, and constitute an in the trades, so that a peaceful | unwarranted assault upon the honor and but dependent race might have a dignity of the House, and have the unqualified disapproval of the House. The closing work of the Senate was devoted to a review of the legislation of the present session.

Mr. Manderson said that the Senate had passed 709 Senate bills and of those the House had passed 120. The House | will be about 480,000,000 bushels. In had passed 460 House bills; and of 1891 it was about 612,000,000 bushels, those the Senate had passed 314. Of all the Presidential nominations that had come to the Senate during this session there had not been a single one rejected, and but three nominations had died on the executive calendar of the

This congratulatory expression drew from Senator Allison a statement of the comparative expenditures of this Congress and the last. The appropriations of the first session of the 51st Congress were, in round numbers, \$463,000,000, and those of the present session \$507,-000,000, showing an increase at this session of \$44,000,000. The principal increases were in appropriations for pensions and for the Post Office Department. There were some diminutions at the present session, notably in the deficiencies, to the amount of \$5,000,000. There was also a diminution of \$4,000,-000 in miscellaneous appropriations.

Mr. Gorman, a member of the Committee on Appropriations, commended the chairman of that committee for his fair and candid statement. The fact mained, however, that the appropriations at this session would exceed \$500,000,000, notwithstanding the extraordinary efforts of the House of Representatives to keep them within reasonable bounds. It was not altogether a party matter; for these immense appropriations were partly made necessary because of the growth of the country, the extension of the postal system and the extension of the pension system and other permanent and necessary expendi-

THE WORLD'S WHEAT CROP.

A Falling Off in the United States of 132,-000,000 Bushels.

From reliable reports, collected in New York, it is estimated that the total outturn of wheat in the United States showing a decrease this year of 182,000, 000 bushels, or about 20 per cent. The country will eat 8,000,000 bushels more this year, thus making the exportable supply 140,000,000 bushels less than that of 1891. India has a crop about 60,000,000 bushels below that of last year; South America's yield equals that of 1891 as will Australasia's. The harvests of Italy, Hungary, Spain and Portugal is from 10 to 15 per cent below the product of 1891. In Great Britain the product will be about 10,000,000 bushels less than last year. Russia, France and Belgium will have larger crops than last year. America's crop, although far below last year's yie's is about the average product based upon the harvests of the past twelve years.
